## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance: Claim 1 includes limitations that a method of calibrating infrared sensing devices comprises comparing a detected radiation value to a threshold and emitting a pulse of infrared radiation, where the pulse amplitude is determined by the comparing step. Claim 5 includes limitations that an infrared sensing device is configured to compare a detected radiation value to a threshold and to emit a pulse of infrared radiation, where the pulse amplitude is determined by the comparing step.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Black, U. S. Patent No. 5,510,269 describes a method for calibrating an infrared sensing device (fig. 4) comprising detecting transmitted infrared radiation, storing a range of output values in a control module (col. 9, lines 18-28), and determining an infrared emitter output level using a microprocessor (fig. 13, col. 9, lines 29-61).
